One console for the whole forecourt

Every part of running a pump — sales, stock, money and compliance — in modules that share the same data. Enter a reading once; it flows to the close, the ledger and the register.

Totalizer sales

Open/close readings auto-compute litres & amount per nozzle — testing and own-use included.

Tank dips & stock

Dips, deliveries and book stock per tank — variance surfaces leaks the same day.

Day-end reconciliation

Cash, card, UPI and credit tallied by shift — short & excess flagged automatically.

Credit / udhaar

Running party ledgers with limits and ageing — the credit diary, digital.

Lubricants & retail

Lube and shop SKUs with stock, margins and GST — sold in the same close.

GST invoicing

CGST/SGST tax invoices with PDF export and input-tax-credit tracking.

Fleet cards

Issue and settle fleet/loyalty cards with per-vehicle limits, reconciled nozzle-side.

Density @ 15°C

Observed density & temperature auto-corrected to 15°C — an audit-clean register.

Reports & exports

Daily/weekly reports with one-click CSV and Tally export — your data stays yours.

HOW IT WORKS

01

Enter the reading

Attendant or manager keys the nozzle's closing meter — on the phone, at the pump.

02

Everything computes

Litres, amount, tank stock, shift totals and party ledgers update in one motion.

03

The register writes itself

Day-end tallies cash to sales; the DSR, GST and density registers are generated — not typed.

Enter it **once**. The registers write themselves, the day tallies to the rupee, and the close that took an hour takes **minutes**.

NO RE-TYPING · NO PARALLEL REGISTERS · NO END-OF-MONTH SURPRISES

Built for India — and for your phone

Generic forecourt software skips Indian compliance and lives on a desktop. OilMart India does both properly — statutory paperwork is generated from the readings you already enter, and a native mobile app rides along.

Daily Stock Register

Opening → receipt → sales → closing per product.
Inspection-ready, filed daily, printable.

GST & ITC

Return-ready tax summaries, party-wise credit ageing and purchase ITC from real sales.

Density register

Observed density + temperature corrected to 15°C — clean evidence for quality checks.

Native mobile app

Android app on Google Play, updated over-the-air — managers close at the forecourt, owners watch from anywhere.

Team & attendance

GPS check-in inside a 200 m geofence, photo roll-call each morning, and a daily checklist reported to the owner by noon.

Premium changeover

Converting a tank or nozzle to Speed / Power? A guided cutover keeps the totalizer and history intact.

REPORTS & STATUTORY REGISTERS

Print it, export it, or hand it to the inspector

- ✓ Daily Stock Register (DSR)
- ✓ Shift & day-end reconciliation
- ✓ Density & temperature register
- ✓ GST & sales summaries
- ✓ Owner / multi-pump roll-up
- ✓ CSV + Tally export

DAILY STOCK REGISTER · 13 JUN 2026 · LITRES

PRODUCT	OPEN	RECD	SALES	CLOSE
MS	21,540	12,000	9,310	24,230
HSD	33,210	20,000	15,180	38,030
XP95	4,120	0	610	3,510

Your data, secured & auditable

Role-based access · two-factor login · encrypted secrets · automatic daily backups · every correction and void logged with who, when and why.

Live on your pump in days, not months

Every outlet is different — talk to us for a plan and quote tailored to your pump, including onboarding, installation and support. Your data always exports cleanly to CSV and Tally.

1

Book a demo

A 20-minute walkthrough on your own forecourt's numbers — web and the Android app.

2

We set you up

We load your pumps, tanks, nozzles and prices, and import opening stock so day one just works.

3

Close your first shift

Enter readings, tally cash & UPI, and file the DSR — your first clean close in minutes.

Every subscription includes

- ✓ All modules — sales, stock, money & compliance
- ✓ DSR, GST & density registers
- ✓ Automatic daily backups
- ✓ Free updates to statutory formats
- ✓ Web console + native Android app
- ✓ Over-the-air updates & new features
- ✓ Onboarding, training & support
- ✓ Try it now — "Explore a live demo" in the app

Do I need new hardware?

No. Any Android phone and a browser — your existing pumps, totalizers and tanks work as they are.

Can my whole team use it?

Yes. Attendant to owner, each role sees exactly what it needs — simple screens, built for the forecourt.

What about my existing records?

We import opening stock and balances at setup, and you can export everything to CSV or Tally anytime.

GET STARTED

See your first close in 40 seconds.

Book a demo and we'll set up your station with sample data — no commitment. Pricing on request, tailored to your outlet.
